KELLY SEED COMPANY

WHOLESALE FIELD
and GARDEN SEEDS

ESTABLISHED
1905

Terms, Net Cash—Subject to Market Changes—All Prices F.O.B., Peoria or San Jose

We give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds we send out and will not in any way be responsible for the crop. We send out only high grade tested seed, but will not be responsible for the crops as this depends on too many things such as weather, condition of soil, cultivation, and other things of which we have no control. If the purchaser does not accept the goods on these terms, they are to be returned at once.—KELLY SEED COMPANY.

Rosen Rye, bu.....	1.00
Buckwheat, bu.....	
Cowpeas, Mixed, bu.....	

Seed Situation As We See It

To start the season the carry over of all field seeds were small, mostly all used up the past two years. Much of the 1940 crop of alfalfa went into the ground for last fall's seeding. Heavy rains is not inductive to a seed crop. Heavy rains and winds at threshing time, much of the crop was lost. In addition to this England has bought millions of pounds of seed out of the short crop. In the past the East imported much of their red clover and alsike. With all exports cut off they will have to come West to get their seed.

Sweet Clover, which early in the season looked to be a big crop, was mostly all lost by winds and weeks of wet weather.

Red Clover is also a very short crop. Last year Illinois produced 440 carloads of red clover. This year only about 155 cars were produced, one of the smallest crops in several years. Red clover is the cheapest seed we have on the list and large quantities of it should be used.

Timothy. A very short crop in the main producing sections and has advanced rapidly in price since last July.

Soy beans. A large crop, but most of the crop unfit for seeding purposes. With increased acreage we look for a heavy demand for seed beans.

Oats. In many sections the yields were good, but much of the crop light in weight, (26 to 30 pounds per bushel) and not the best for seed. We have about 40,000 bushel of good seed oats at reasonable price as you will note from prices on opposite side of sheet.

Seed Corn. A large crop but most of it harvested late, and with weeks and months of wet weather, a lot of close sorting and hand work is necessary and with the best of work all seed corn is going to show some damaged grains. Extra sorting and grading is reducing the quantity and with a much heavier demand from Nebraska, Missouri, Kentucky, Pennsylvania and some of the other eastern states, who have never used much Hybrid corn, the best Hybrids are mostly all sold now. **One million bu. extra required to plant increased acreage.**

With advancing grains and commodity prices, seeds are still too low in price. All prices quoted subject to market change.

SPECIAL OFFERS

Chief soy beans, a new outstanding yellow bean	\$2.50 bu.
Kirkbride, yellow bean, a very good bean ..	2.25 bu.
Illini soy beans	2.25 bu.
Marion Certified oats, weigh 37½ pounds, germination 95%	1.50 bu.

K. B. Red Clover, 25% fancy purple Idaho seed, 75% Illinois grown	13.50 bu.
K. B. Mammoth Clover, fine quality	13.50 bu.
K. B. White Blossom Sweet Clover	8.00 bu.
K-374 Hybrid corn, the best Hybrid we ever produced or tested in our test plots, limit 3 bushels to a customer, large or medium flats	7.50 bu.
K-99 and K-42, two outstanding Hybrids, large or medium flats	7.00 bu.

LOWER PRICED CORN

For anyone wanting lower priced corn we advise planting large or medium rounds, which only cost \$2.50 to \$4.50 per bushel. These can be planted more evenly than flats with the proper plates and will produce equally as well. With an order for five bushel or more of rounds we give you free a set of plates for any standard make planter.

Mixed Hybrids: These we furnish in all five grades, prices \$3.00 to \$4.50 per bushel for the best large or medium flats. Comes off the same ears as the \$6.00 and \$7.50 corn. Note we have early and late mixed Hybrids.

1940 Crop—Germination 94% or Better

Number	Flat or Medium Flats	Regular Flats or Medium Rounds	Large Rounds
US-13		\$3.50	\$2.50
K-42		3.50	2.50
200		3.50	2.50
205	\$4.50	3.50	2.50
499	4.50	3.50	2.50
805	4.50	3.50	2.50
US-44		3.50	2.50
Ill. 374	4.50	3.50	2.50

Some of above Hybrids we have only small quantities. Send order at once.

INTRODUCTORY HYBRID ASSORTMENT

If you have never planted any of our Hybrid corn you should at least take advantage of this exceptional offer of one peck each of five different Hybrids, your choice, or we will select best adapted varieties for your section, for only \$5.00 freight prepaid. Here you can test out five of our best Hybrids at a cost of 50c per acre. We lose money on everyone of these assortments, but this has proven to be the best plan for introducing our Hybrids we have ever tried. We now have some dealers who have already sold 500 bushel of corn this year, who started out with one of these five peck assortments. We naturally would like to have you order something else to go with this assortment. If you can use the assortment in medium rounds or regular flats we will make the five pecks for \$4.00 freight prepaid.

1,000,000 BU. EXTRA WILL BE REQUIRED TO PLANT INCREASED ACREAGE IN 1942.
